

Leading the way in carbon emission reduction technologies

Clean Fuel and Chemical Technologies

Haldor Topsoe

Topsoe has technologies in turning most types of feed into most types of low carbon emission fuels, energy and chemicals

Perfecting chemistry for a better world

- A passion for chemistry
- A vision to lead the global transition into the renewable future and reduce carbon emissions

We are deeply committed to using our exceptional R&D capabilities in the development of necessary technologies to solve the global challenge

15

Present in 15 countries across 5 continents

2200

Employees

824

Million Euros in revenue

8%

R&D investments of annual revenue

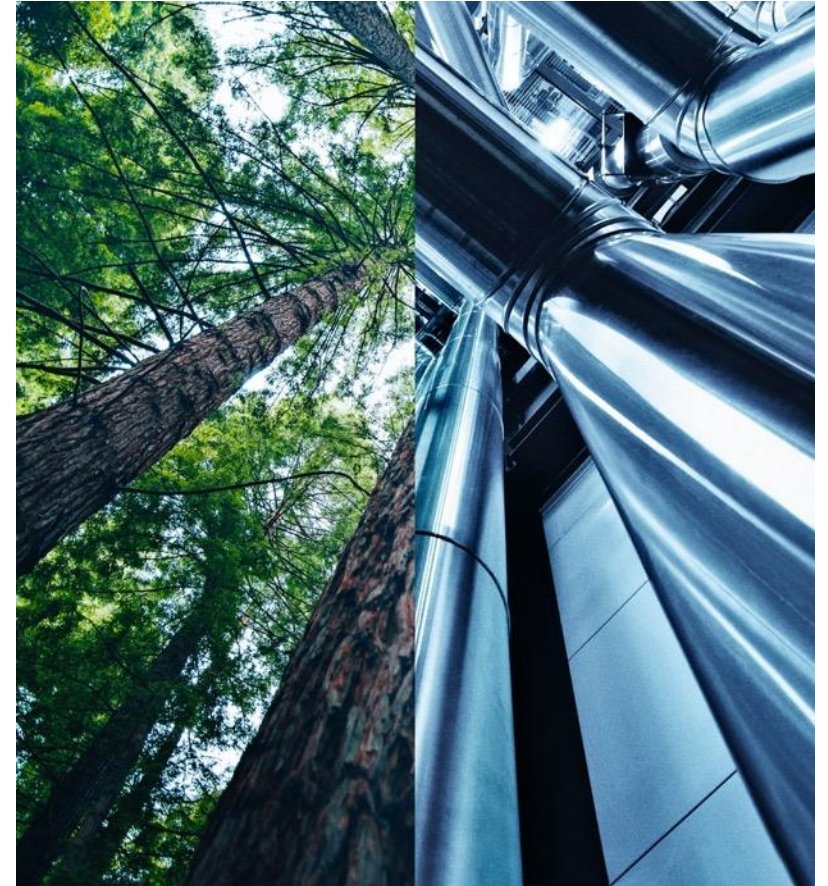

HydroFlex™ helps you extend your market share with a solution for future-proof business

Biofuels | Recycled carbon fuels

Produce gasoline, jet fuel, or diesel from almost any feedstock with our proprietary hydrotreatment technology

- Achieve full feedstock flexibility
- Leverage our unique renewables knowledge
- Explore new growth opportunities
- Reduce CAPEX by up to 30% with an integrated hydrogen unit

Perfecting chemistry
for a better world
